

MAPPING FOR CRISIS

OpenStreetMap: A Lifeline in Flash Flood Response

REAL-TIME MAPS FOR REAL-TIME RELIEF.

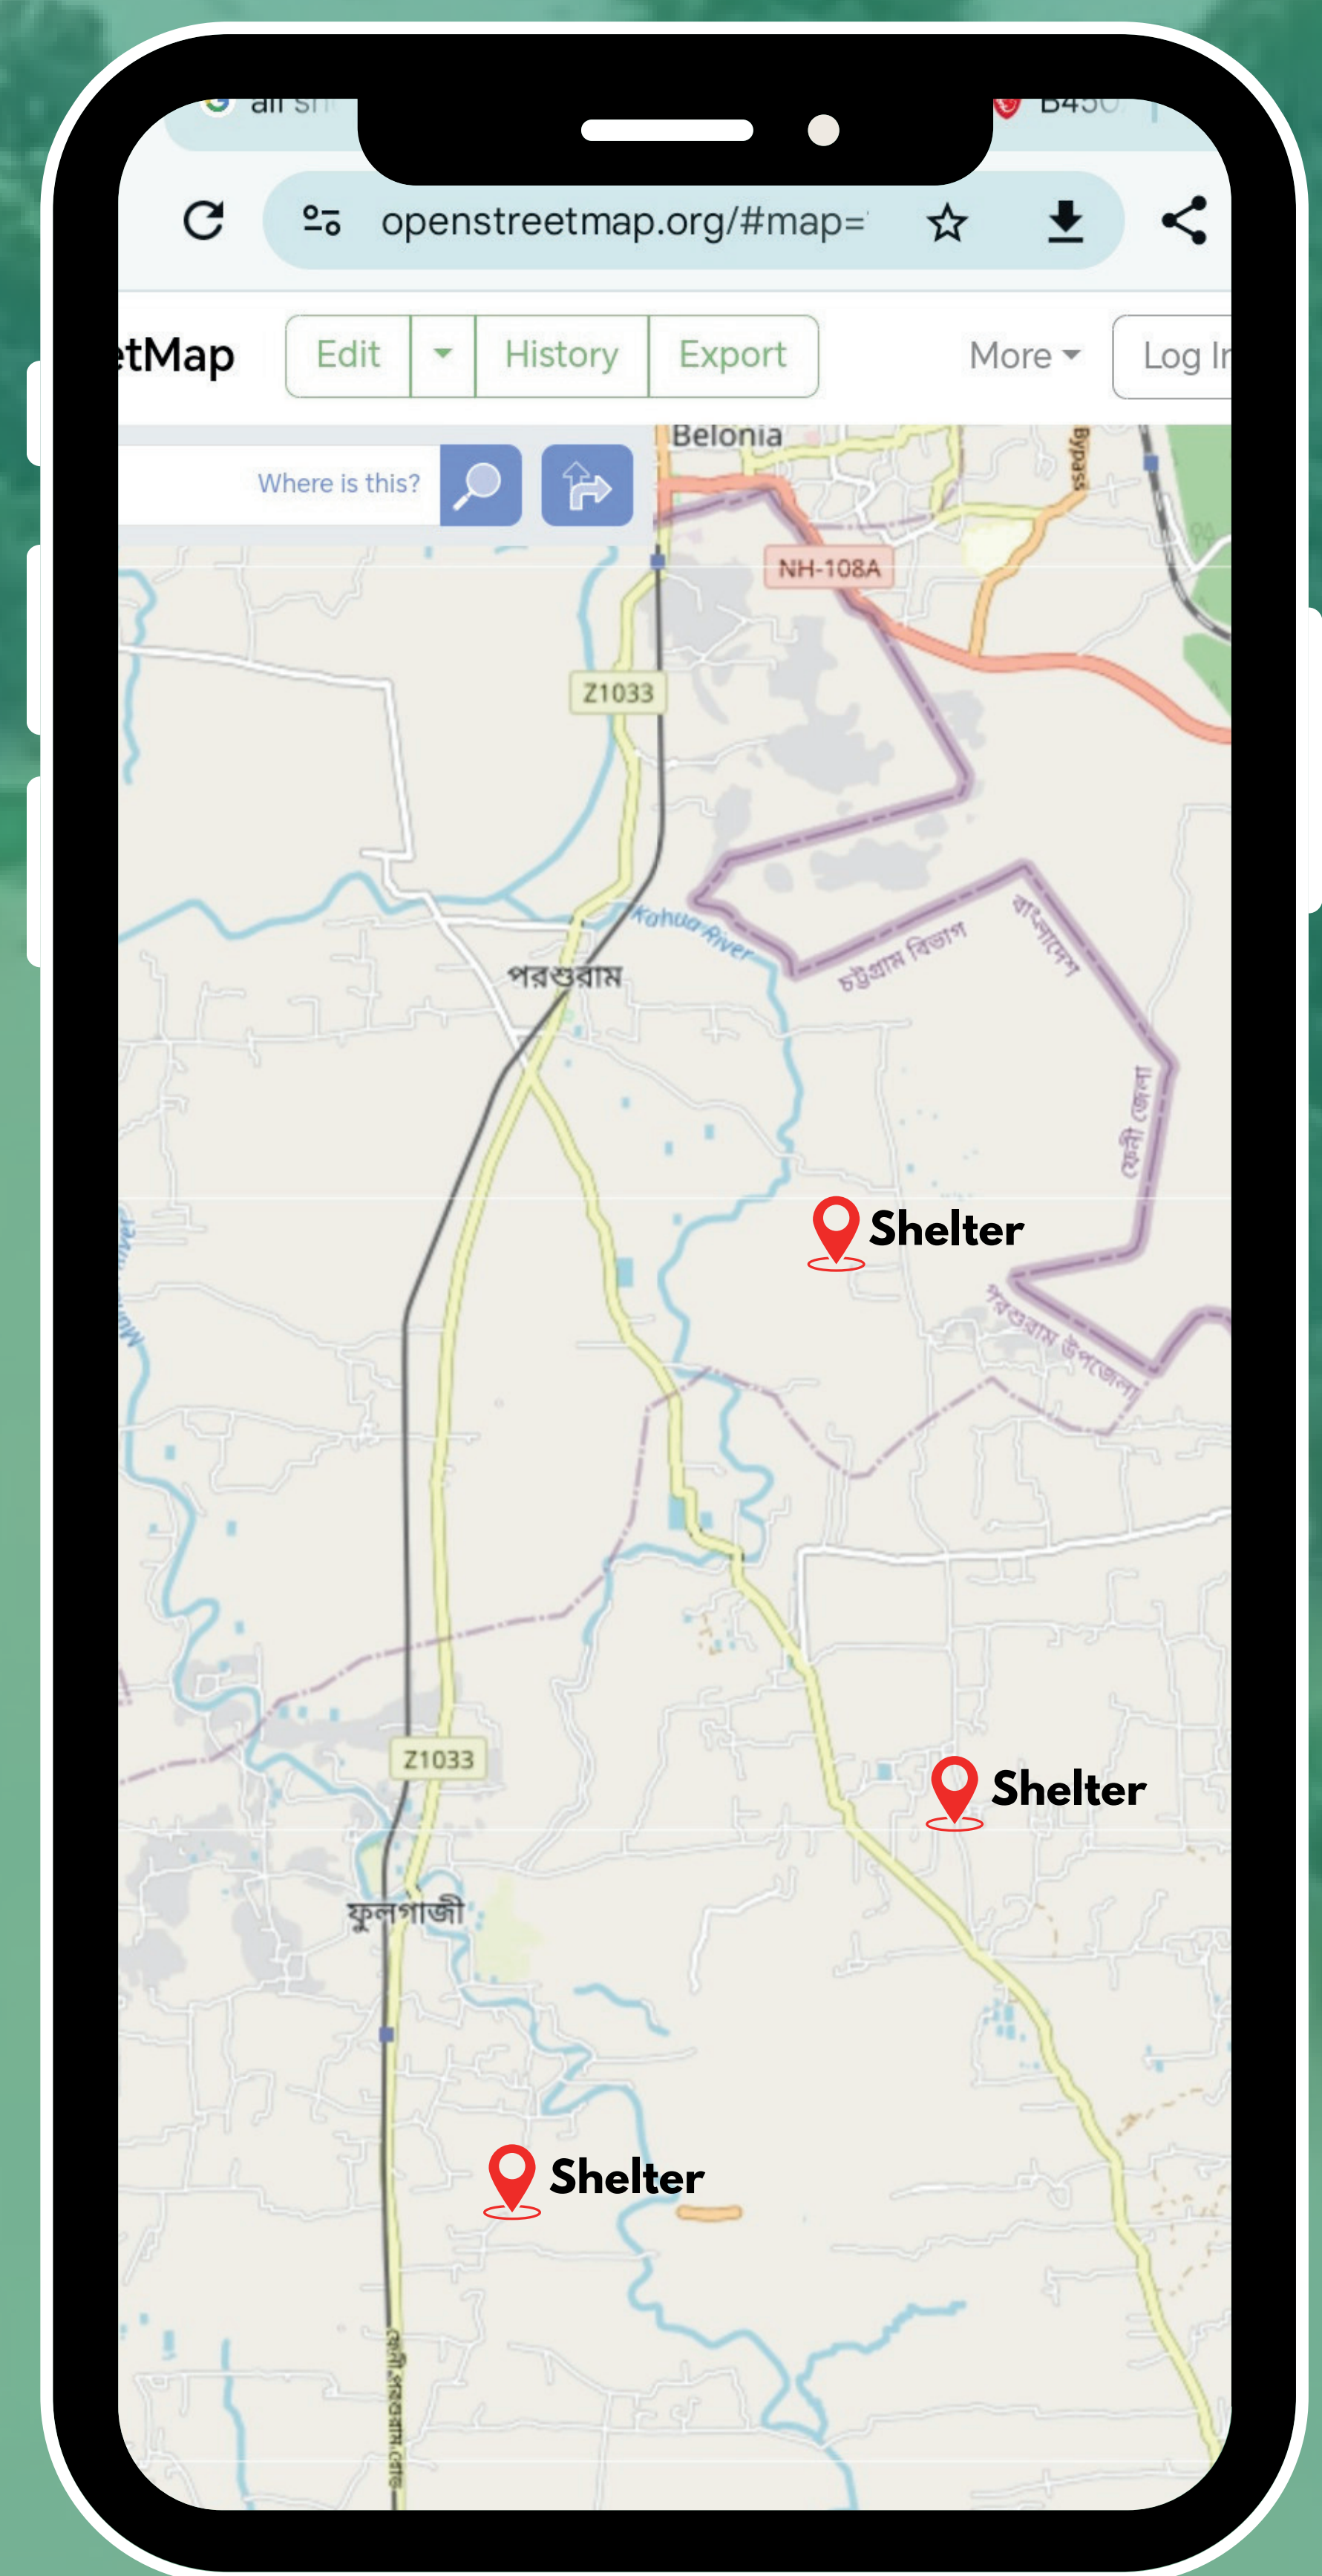

Every person informed makes a difference

OSM's Role

During flash floods, OpenStreetMap provided updated maps showing flood zones, blocked roads, and relief centers, helping rescue teams navigate safely and deliver aid swiftly

Community Mapping

Volunteers rapidly updated OSM, offering critical data to ensure efficient rescue operations

OSM map showing real-time updates of affected areas and active relief points during the floods
