

PERSPECTIVES OF WOMEN* PARTICIPATION IN OPENSTREETMAP

Over time, there has been a noticeable increase in the engagement of women in OSM activities, yet disparities still exist that require attention. However, the purpose of this survey was to get opinions from people of all genders regarding *women's participation in OSM activities.

155 participants took part in the survey from over 50 countries across the world.

Gender Composition

LET'S TAKE ACTION BY:

1

Recognising under representation of women in OSM is crucial for understanding and addressing issues faced by these underrepresented groups.

2

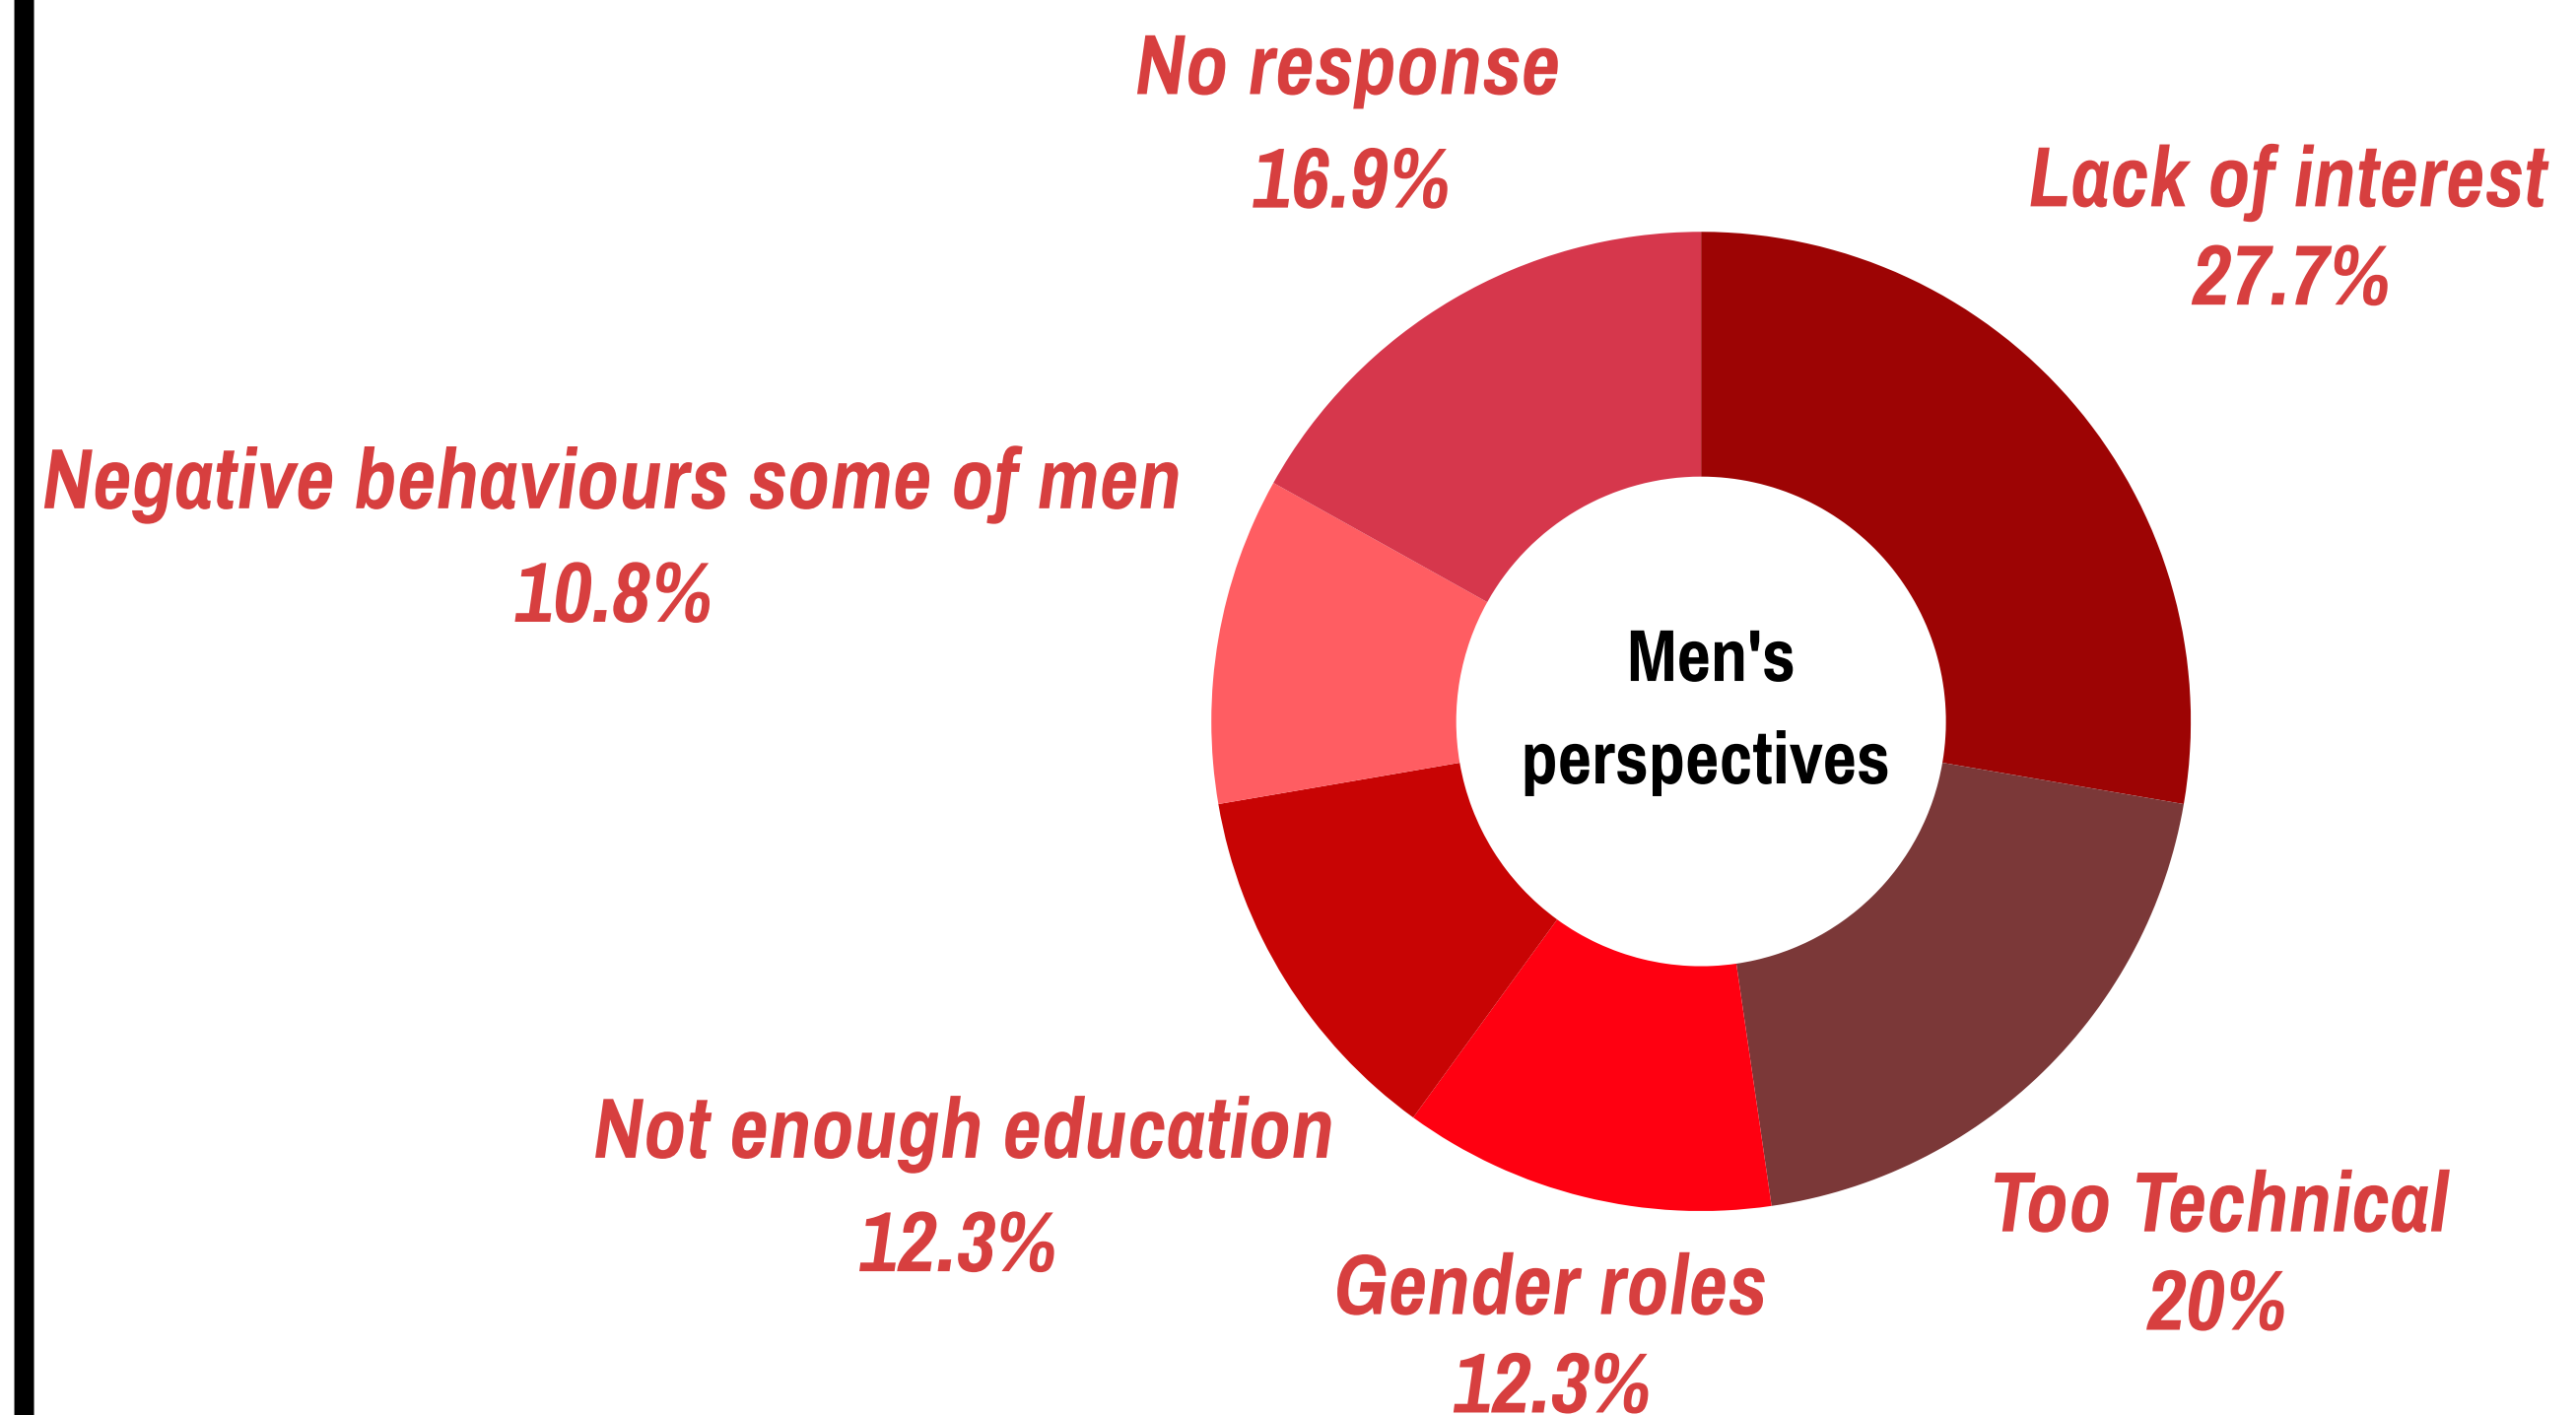

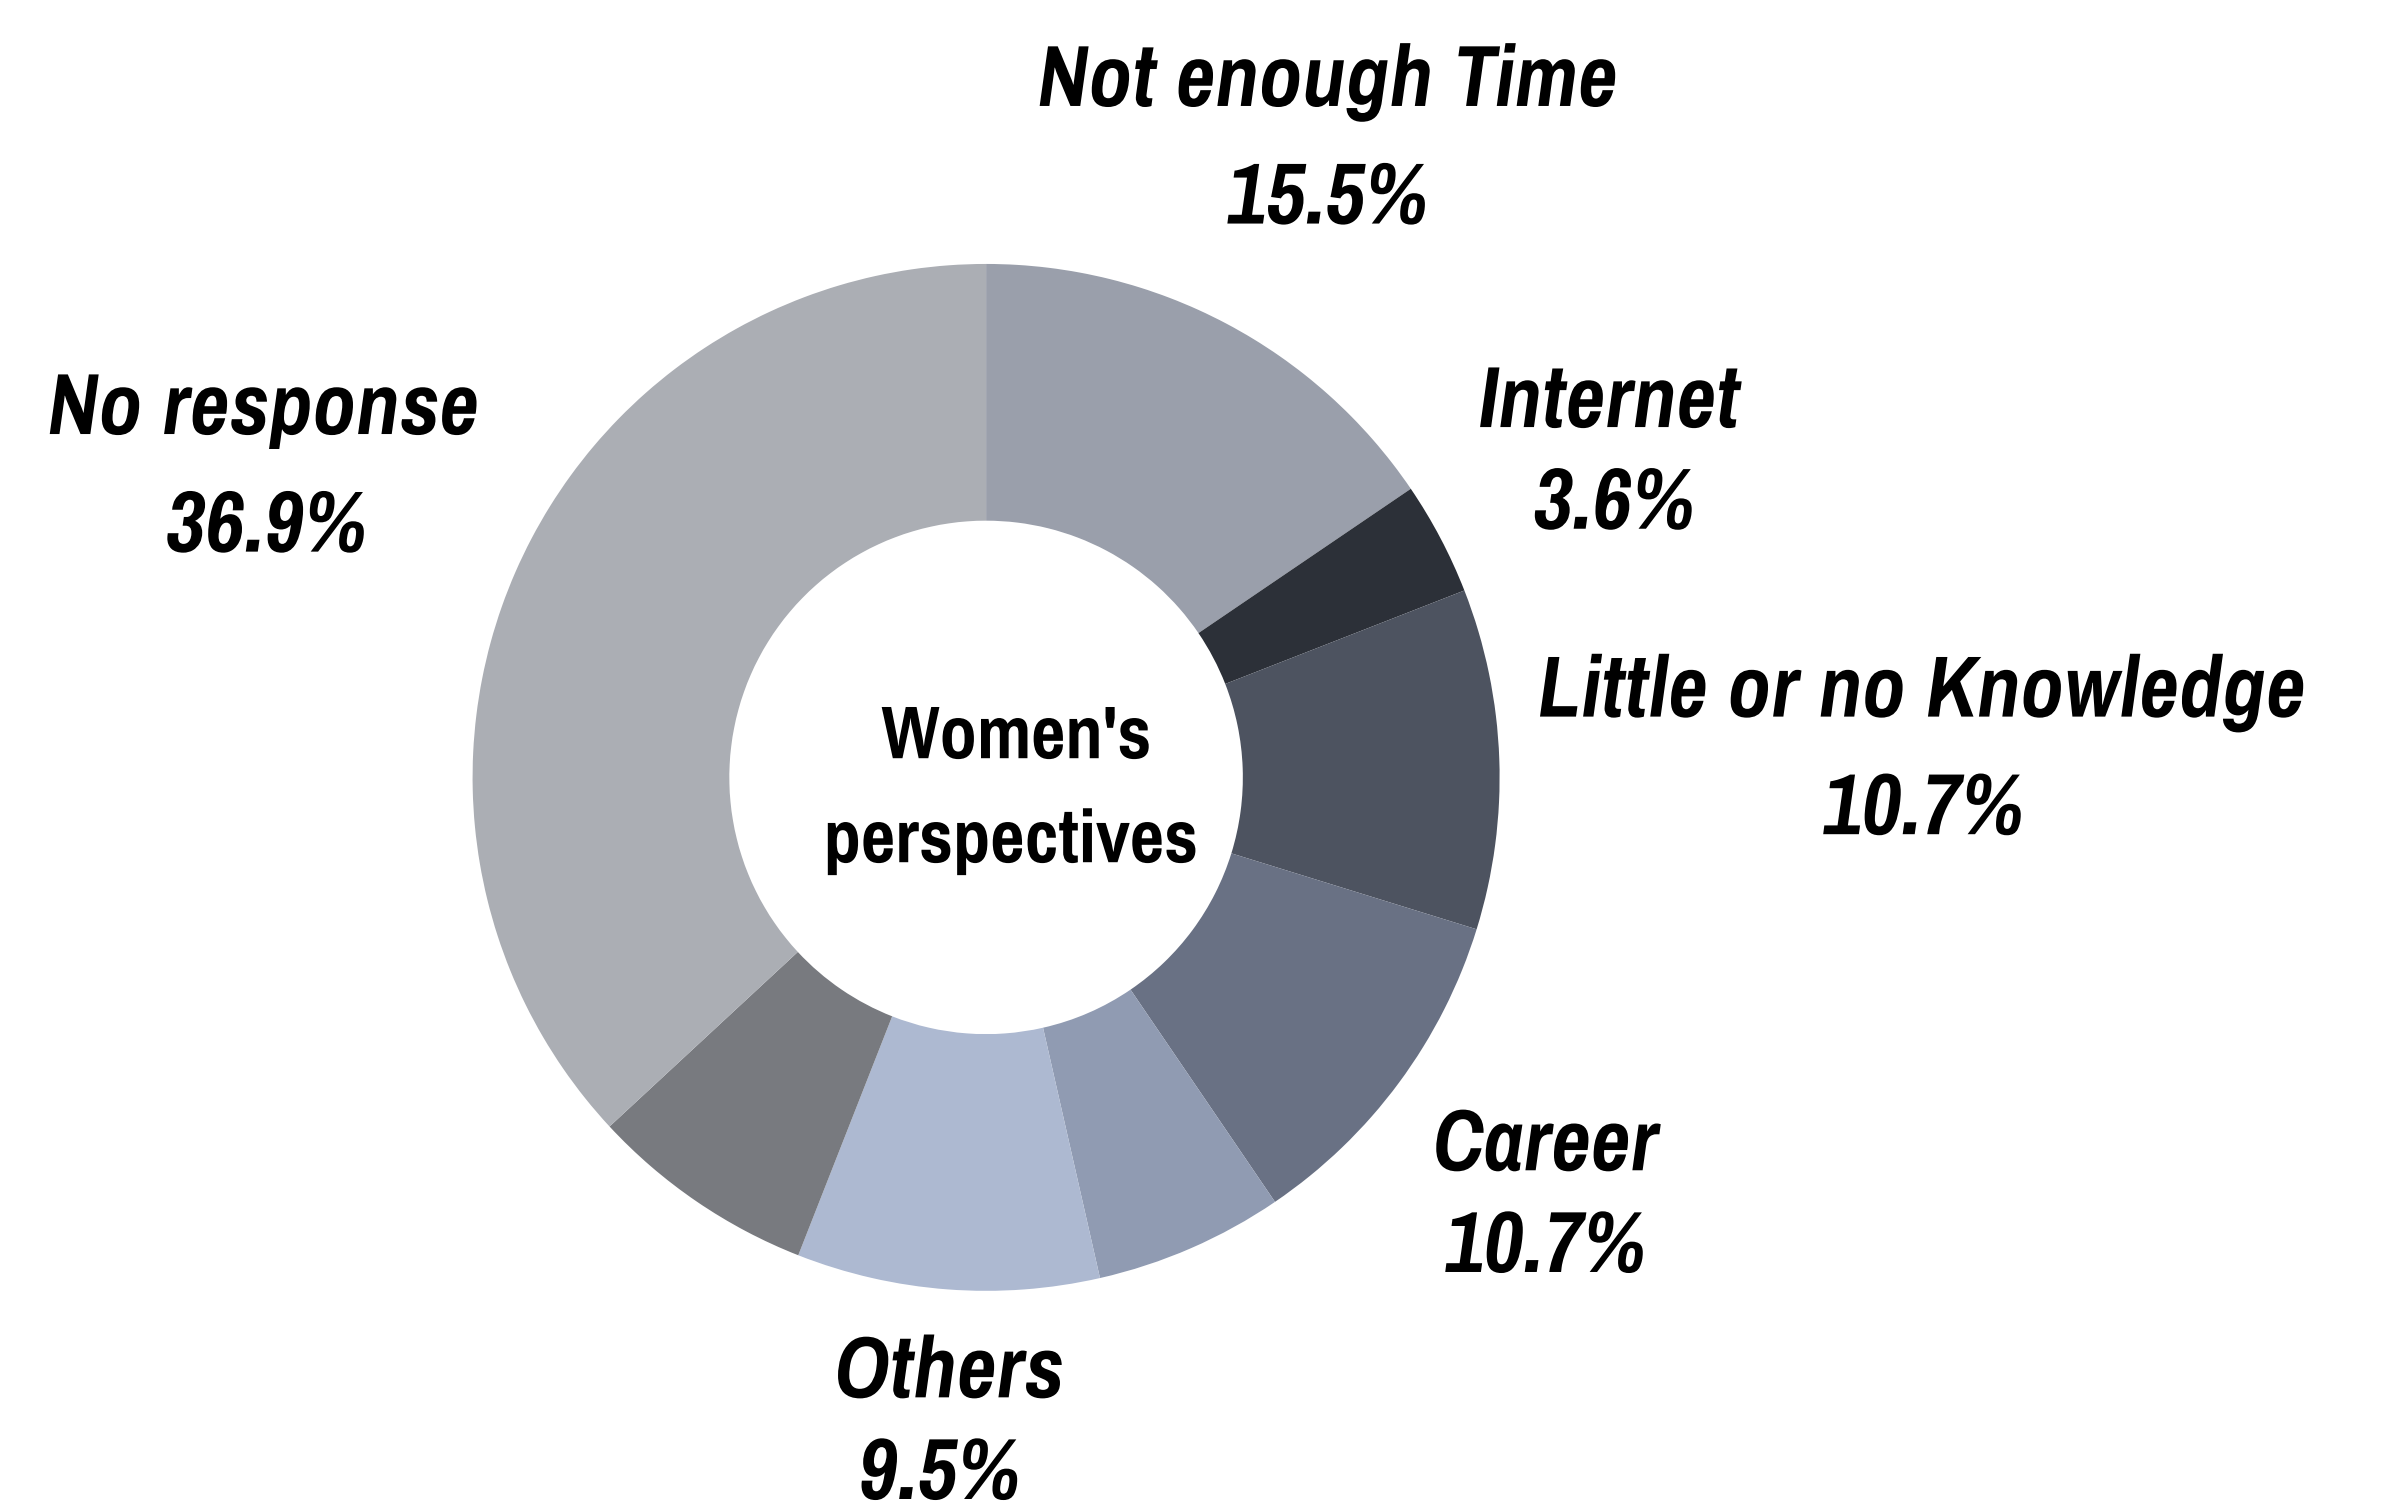

OSM Communities can empower women by providing support and recognition.

3

Be mindful of your own biases and of gender sensitive themes.

PERSPECTIVE: WHAT PREVENTS WOMEN* FROM PARTICIPATING IN OSM?

“We should recognize the need to address gender disparity in OSM and create a deliberate move to address those issues”.

Stellamaris Wavamunno Nakacwa
